

4th International Conference on Networked Systems 2019

March 18 - 21, 2019 – Munich, Germany

Sponsorships
<http://www.netsys2019.org>

The Conference on Networked Systems (NetSys 2019) provides an international forum for engineers and scientists in academia, industry, and government to discuss recent innovations in the realm of networked systems. NetSys 2019 is co-organized with the ITG Future of Networking 2019 symposium.

NetSys is a biennial event that originates from the key scientific conference on networked systems in German-speaking countries *KiVS (Kommunikation in Verteilten Systemen)* – which was initiated 37 years ago and has international orientation since 2013. NetSys is organized by the special interest group “Communication and Distributed Systems” (KUVS), which is anchored both in the German Computer Science society (Gesellschaft für Informatik, GI) and in the Information Technology society (Informationstechnische Gesellschaft im VDE, ITG). In 2019, the annual 1-day ITG expert symposium “Future of Networking” (Zukunft der Netze, ZdN) organized on an invitation only basis will be an integral part of the conference.

SPONSORING OPPORTUNITIES

GOLD	3000 € + VAT	<ul style="list-style-type: none"> • Company logo (web, program brochure, proceedings, poster) • 2 free conference tickets • 3 advertising materials included in the conference package • Advertisement in program brochure (1 full page) • Display of advertising material (conference area, social dinner)
